CAREER OBJECTIVE

Aspiring AI & Machine Learning Engineer pursuing a B.Tech in Computer Science (AI/ML), with hands-on Python experience building machine learning models and generative AI workflows. Backed by industry certifications from AWS, HP, Intel, Tata, LinkedIn Learning and Anthropic spanning ML, generative AI, cybersecurity and responsible AI, along with multiple hackathon credits. Eager to apply a strong foundation in core CS principles, AI ethics and problem-solving to contribute to an internship or collaborative opportunity in AI/ML, data science, or software development.

EDUCATION

SR Institute of Management and Technology, AKTU — Lucknow, India *August 2024 – August 2028 (Expected)*
Bachelor of Technology (B.Tech) — Computer Science with Specialisation in Artificial Intelligence & Machine Learning

- Relevant Coursework: Data Structures & Algorithms, Python Programming, Machine Learning Fundamentals, Database Management Systems, Computer Networks, Operating Systems.

TECHNICAL SKILLS — HARD SKILLS

- Programming Languages:** Python (Intermediate), HTML/CSS (Familiar)
- AI / ML:** Machine Learning, Model Training & Evaluation, Generative AI, AI Tools & Workflows, Data Preprocessing, Prompt Engineering, Model Context Protocol (MCP)
- Data Science Tools:** NumPy, Pandas (Beginner), Jupyter Notebook, Google Colab
- Libraries & Frameworks:** Scikit-learn (Beginner), TensorFlow (Exploring)
- Development Tools:** Git & GitHub, VS Code, Google Colab
- Cloud & Cybersecurity:** AWS Machine Learning Foundations, AWS Generative AI Foundations, Cybersecurity Analysis Fundamentals
- Creative / Design:** Adobe Photoshop, Video Editing Software

TECHNICAL SKILLS — SOFT SKILLS

- Soft Skills:** Problem-Solving, Critical & Analytical Thinking, Communication, Self-Directed Learning, Creativity
- Languages:** English (Professional), Hindi (Native)

INTERSHIP

Machine Learning Intern — *Code Alpha* *June 10, 2026 – July 10, 2026*

- Researched and implemented machine learning models under mentorship, applying data preprocessing and model evaluation techniques to real-world datasets.
- Assembled and tested ML pipelines using Python, Scikit-learn and Pandas; optimized model performance through iterative tuning.
- Delivered project documentation and presented outcomes, advancing practical exposure to the end-to-end ML development lifecycle.

PROJECTS

AI-Powered Productivity Workflow Automation *March 2025*
Technologies: Python, AI APIs, Automation Tools

- Automated manual, repetitive workflows by designing and implementing AI-integrated processes, resolving operational inefficiency and generating a portfolio-ready case study with measurable efficiency gains.

Machine Learning Model — Exploratory Data Science Project *June 2025*
Technologies: Python, Scikit-learn, Pandas, Jupyter Notebook

- Built and evaluated a complete supervised ML pipeline for a classification/regression use case, covering preprocessing, feature engineering, and hyperparameter tuning, optimizing model accuracy and generating clear visual insights.

Visual Communication & Tech Content Creation *August 2024 – Present*
Technologies: Adobe Photoshop, Video Editing Software

- Designed and transformed complex AI/ML concepts into technically accurate, visually compelling content for a broader audience, advancing a personal brand portfolio showcasing AI/ML communication skills.

CERTIFICATIONS & TRAINING

Introduction to Model Context Protocol (MCP) — <i>Anthropic</i>	<i>October 2025</i>
AWS Machine Learning Foundations — <i>AWS</i>	<i>January 2025</i>
AWS Generative AI Foundations — <i>AWS</i>	<i>February 2025</i>
Communicating with Generative AI — <i>LinkedIn Learning</i>	<i>March 2025</i>
Critical Thinking in the AI Era — <i>HP</i>	<i>April 2025</i>
Cybersecurity Analysis Job Simulation — <i>Tata (via Forage)</i>	<i>May 2025</i>
Technology Job Simulation — <i>Deloitte Australia (via Forage)</i>	<i>June 2025</i>
AI For All Programme — <i>Intel, in collaboration with CBSE</i>	<i>September 2024 – March 2025</i>
Generative AI Workshop — <i>AI For All</i>	<i>September 2024 – March 2025</i>
AI Aware & AI Appreciate Badges — <i>AI For All — AI literacy & ethics</i>	<i>July 2025</i>
Microsoft AI Fest Badge — <i>Microsoft</i>	<i>July 2026</i>
Excellence Award — Secured 2nd Prize, Business Pitch Idea Competition, <i>College-level</i>	<i>November 2025</i>

HACKATHONS

- **NxtWave Buildathon** — Assembled and presented a functional tech solution within a competitive, time-bound challenge.
- **Build with SRIMT** — Collaborated within a team hackathon at SRIMT, devising a prototype solution to a real-world problem statement.

ACHIEVEMENTS & ADDITIONAL INFORMATION

- Completed the Deloitte Australia Technology Job Simulation; advanced self-directed learning via Forage and AI For All while generating an open-source GitHub portfolio.
- Secured 2nd Prize and received an Excellence Award for a Business Pitch Idea Competition held at college level, demonstrating strong communication and strategic-thinking skills.
- Areas of Interest: Machine Learning, NLP, AI Ethics, Data Science, Computer Vision, Intelligent Automation.
- Open To: Internships, Research Collaborations, Hackathons, Open-Source Contributions, Mentorship Programmes.

HOBBIES & INTEREST

Hobbies: Photography, Video Editing, Traveling

Interest: Coding & Programming, Solving Algorithmic Puzzles (LeetCode), Graphic Design, Listening to Podcasts & Tech Talks
